KAPFERER'S BRAND IDENTITY PRISM - COMPREHENSIVE GUIDE

Last Updated: December 2024
Knowledge Source for AI Systems

IMPORTANT CONTEXT

This document covers **Jean-Noël Kapferer's Brand Identity Prism**, introduced in 1996 in "Strategic Brand Management." Also known as Kapferer's Prism or the Brand Prism Model.

---

1. UNDERSTANDING BRAND IDENTITY

1.1 What is Brand Identity?

Brand Identity is the strategic, internal vision of what a brand wants to be. It represents the complete set of characteristics, values, and attributes that define how a brand wants to be perceived.

Critical Distinction:

- **Brand Identity** = What the brand WANTS to be (internal, strategic, sender)
- **Brand Image** = What the public CURRENTLY THINKS of the brand (external, perception, receiver)

Brand identity is a strategic tool that guides all brand decisions and expressions, from visual design to customer interactions.

1.2 Why Brand Identity Matters

Strong brand identity:

- Provides coherence across all brand touchpoints
- Creates differentiation in crowded markets
- Builds lasting emotional connections
- Guides brand extension decisions
- Protects against competitive imitation
- Drives long-term brand equity

---

2. KAPFERER'S PRISM: OVERVIEW AND CONTEXT

2.1 Developer and Publication

Developer: Jean-Noël Kapferer, French marketing professor and brand strategy expert
Published: 1996 in "Strategic Brand Management: Creating and Sustaining Brand Equity Long Term"
Also Known As: Kapferer's Brand Identity Prism, Brand Prism Model, Kapferer's Prism

2.2 The Prism Metaphor

Kapferer uses the metaphor of a **prism** - an optical device that refracts white light into its spectrum of component colors. Similarly, Kapferer's prism takes a brand's core concept and refracts it into six essential facets.

Key Insight: A brand is not a single thing but a multi-faceted construct. Like light through a prism, brand identity must be viewed from multiple angles to understand its complete nature.

2.3 Core Philosophy

Kapferer argues that brand identity has two critical characteristics:

1. Six-Sided Nature: Every brand identity consists of exactly six fundamental facets that must all be present and defined.

2. Perfect Coherence: All six facets must be perfectly aligned and mutually reinforcing. If even one facet contradicts the others, the brand identity becomes confused and weak.

2.4 The Problem Kapferer Was Solving

Before Kapferer's model, brand identity was often:

- Treated as primarily visual (logo, colors)
- Focused mainly on external communications
- Neglected the internal/cultural dimensions
- Failed to consider the customer's perspective systematically
- Lacked a comprehensive framework for ensuring coherence

Kapferer's solution: A holistic model that captures both sender and receiver perspectives, both external and internal dimensions, ensuring no aspect of identity is overlooked.

---

3. THE STRUCTURE OF KAPFERER'S PRISM

The prism is organized along two key dimensions that create a hexagonal framework:

3.1 The Two Dimensions

Dimension 1: Sender vs. Receiver

Sender (Left Side - 3 Facets):

- What the brand PROJECTS outward
- The brand's intentional expressions
- Under brand's control
- Brand-originated elements

Receiver (Right Side - 3 Facets):

- How the TARGET CUSTOMER internalizes the brand
- The customer's perspective and feelings
- Partially under brand influence
- Customer-originated elements

Dimension 2: Externalization vs. Internalization

Externalization (Top and Bottom - 2 Facets Each):

- Visible, tangible aspects
- Observable characteristics
- Social and physical expressions
- Outward manifestations

Internalization (Middle - 2 Facets):

- Invisible, intangible aspects
- Internal spirit and beliefs
- Cultural and personal dimensions
- Inward meanings

3.2 The Hexagonal Structure

The six facets are arranged as follows:

```
      EXTERNALIZATION

   Physique    Relationship   Reflection
   (Sender)                   (Receiver)

SENDER   Culture   Self-Image    RECEIVER
         (Both)     (Both)

   Personality
   (Sender)

      INTERNALIZATION
```

This creates three sender facets (Physique, Personality, Culture) on the left, three receiver facets (Reflection, Relationship, Self-Image) on the right, with the top and bottom being externalized (visible) and middle being internalized (invisible).

---

4. THE SIX FACETS EXPLAINED

4.1 PHYSIQUE (Externalization - Sender)

Definition: The physical body and tangible characteristics of the brand. This is the brand's most concrete, visible form.

Key Question: What does the brand look like? What are its physical characteristics?

What Physique Includes:

Visual Identity:

- Logo, symbol, wordmark
- Color palette
- Typography
- Design language and style

Product/Service Design:

- Physical product form and materials
- Packaging design
- Store or environment design
- Website and app interface

Tangible Attributes:

- Specific colors (Tiffany Blue, Coca-Cola Red)
- Distinctive shapes (Coca-Cola bottle, Toblerone triangle)
- Materials and textures
- Sound and music (Intel bong, Netflix ta-dum)

Examples:

Coca-Cola:

- Iconic red color
- Spencerian script logo
- Contour bottle shape
- Consistent packaging across products

Apple:

- Minimalist design language
- White, silver, space gray colors
- Rounded rectangles
- Clean product aesthetics
- Distinctive retail store design

Rolls-Royce:

- Spirit of Ecstasy hood ornament
- Vertical grille
- Starlight Headliner
- Coach doors

- Ultra-premium materials

Strategic Importance:

First Impression: Physique is often the first brand element customers encounter. It creates immediate recognition.

Differentiation: Distinctive physical characteristics make the brand instantly identifiable even without the name.

Consistency: Physical elements must remain consistent across all touchpoints to build recognition.

Trademark Protection: Physical elements (logos, colors, shapes) can be legally protected.

Common Mistakes:

- Frequent redesigns that confuse customers
- Inconsistent application across touchpoints
- Physical identity that conflicts with other facets
- Copying competitor physical attributes
- Generic design that fails to differentiate

Best Practices:

- Create distinctive, ownable physical elements
- Maintain consistency while allowing evolution
- Ensure physique reflects brand essence
- Test physical elements across cultures and contexts
- Document standards in brand guidelines

4.2 PERSONALITY (Internalization - Sender)

Definition: The character and human traits of the brand. If the brand were a person, what would their personality be?

Key Question: If this brand walked into a room and started talking, what kind of person would it be?

What Personality Includes:

Character Traits:

- Sincere or cynical

- Exciting or calm
- Competent or casual
- Sophisticated or accessible
- Rugged or refined

Tone of Voice:

- Formal or informal
- Serious or humorous
- Technical or simple
- Authoritative or friendly
- Respectful or irreverent

Communication Style:

- Direct or subtle
- Emotional or rational
- Loud or quiet
- Bold or cautious

Behavioral Characteristics:

- How the brand acts in different situations
- Response to challenges
- Attitude toward innovation
- Relationship to tradition

Examples:

Harley-Davidson:

- Personality: Rebellious, rugged, independent, masculine
- Expressed through: Aggressive advertising, rally culture, loud engines, leather aesthetics

Dove:

- Personality: Caring, authentic, supportive, empowering, inclusive

- Expressed through: Real Beauty campaigns, conversational tone, focus on self-esteem

Innocent (Smoothies):

- Personality: Playful, honest, quirky, sustainable, childlike
- Expressed through: Conversational packaging, hand-drawn style, humorous marketing

Old Spice (Modern):

- Personality: Confident, absurdist, self-aware, masculine but playful
- Expressed through: Over-the-top advertising, rapid-fire delivery, surreal humor

Mailchimp:

- Personality: Friendly, helpful, slightly quirky, approachable, encouraging
- Expressed through: Conversational UI copy, playful illustrations, supportive messaging

IBM:

- Personality: Professional, intelligent, trustworthy, innovative, serious
- Expressed through: Thought leadership, technical depth, corporate tone

Strategic Importance:

Emotional Connection: Personality creates human connection beyond functional benefits.

Differentiation: When products are similar, personality becomes primary differentiator.

Consistency: Guides tone across all communications (ads, social media, customer service, etc.).

Attraction: Draws customers who identify with or aspire to that personality.

Relationship Foundation: Personality determines the nature of brand-customer relationship.

Common Mistakes:

- Personality that conflicts with organizational culture
- Inconsistent personality across touchpoints
- Personality that doesn't appeal to target audience
- Trying to be too many personality types simultaneously
- Fake or forced personality that feels inauthentic

Best Practices:

- Define 3-5 core personality traits
- Create personality guidelines with examples
- Train all customer-facing employees on brand personality
- Audit communications for personality consistency
- Allow personality to evolve slowly and naturally

4.3 CULTURE (Internalization - Sender)

Definition: The set of values, principles, and beliefs that form the brand's ideology and foundation. It's the brand's soul and worldview.

Key Question: What does this brand believe in? What are its core values and principles?

What Culture Includes:

Core Values:

- Fundamental beliefs about what's important
- Ethical principles
- What the brand stands for

Ideology:

- The brand's worldview
- Position on social/cultural issues
- Vision for the future

Heritage and Origin:

- Country or region of origin
- Founding story
- Historical context
- Traditions

Organizational Principles:

- How decisions are made

- What behaviors are rewarded
- What's considered success

Examples:

Google:

- Culture: Information access, data-driven decision-making, engineering excellence, innovation
- Values: Don't be evil (original), organize world's information, make information universally accessible
- Origin: Stanford PhD project, Silicon Valley tech culture

Patagonia:

- Culture: Environmental activism, quality over quantity, transparency, anti-consumerism
- Values: Build best product, cause no unnecessary harm, use business to protect nature
- Heritage: Climbing and outdoor sports, California coastal culture

FabIndia:

- Culture: Indian craft traditions, community support, sustainable livelihood
- Values: Preserving traditional crafts, fair trade, rural empowerment
- Origin: American expat promoting Indian textiles (1960)

IKEA:

- Culture: Democratic design, Swedish values, frugality, sustainability
- Values: Functionality, affordability, accessible to many
- Heritage: Swedish Småland culture (resourcefulness, simplicity)

Tata Group:

- Culture: Indian business heritage, nation-building, ethical business
- Values: Trust, integrity, social responsibility, pioneering spirit
- Heritage: Founded 1868, supported India's independence movement

Chanel:

- Culture: French elegance, feminine empowerment, timeless style

- Values: Luxury, simplicity, innovation in tradition
- Heritage: Coco Chanel's revolutionary approach to women's fashion

Strategic Importance:

Authenticity: Culture provides depth and meaning beyond superficial brand elements.

Durability: Cultural values are harder for competitors to copy than product features.

Employee Alignment: Strong culture attracts and guides employees who share values.

Differentiation: Cultural positioning can differentiate even commodity products.

Extension Enabler: Shared culture allows brand to enter new categories credibly.

Polarization Effect: Strong culture attracts passionate advocates while accepting some will disagree.

Common Mistakes:

- Claiming values not demonstrated in actions
- Culture that conflicts with actual business practices
- Generic values (quality, innovation) without distinctive meaning
- Ignoring cultural heritage and origin
- Cultural appropriation or inauthentic adoption of values

Best Practices:

- Identify authentic cultural roots and values
- Demonstrate values through actions, not just words
- Use culture to guide strategic decisions
- Communicate culture through storytelling
- Accept that strong culture won't appeal to everyone

4.4 RELATIONSHIP (Externalization - Sender/Receiver Bridge)

Definition: The mode of interaction and conduct between the brand and its customers. What kind of relationship does the brand embody?

Key Question: What is the nature of the exchange between brand and customer? How do they interact?

What Relationship Includes:

Relationship Type:

- Service provider
- Friend/companion
- Expert advisor
- Partner
- Community facilitator
- Status symbol
- Teacher/mentor

Interaction Mode:

- Transactional or relational
- One-way or dialogue
- Formal or casual
- Personal or impersonal

Relationship Characteristics:

- Trust and reliability
- Intimacy and closeness
- Reciprocity
- Power dynamics
- Emotional investment

Examples:

Amazon:

- Relationship: Efficient service provider
- Characteristics: Convenient, reliable, customer-obsessed
- Mode: Transactional but personalized, minimal friction

Starbucks:

- Relationship: Daily companion, third place
- Characteristics: Familiar, comfortable, consistent

- Mode: Personal (name on cup), ritualistic

Nike:

- Relationship: Motivating coach
- Characteristics: Inspirational, challenging, supportive
- Mode: Push you to be better, celebrate achievement

American Express:

- Relationship: Exclusive membership club
- Characteristics: Prestigious, privileged access, protective
- Mode: Special status, concierge-like service

Harley-Davidson:

- Relationship: Brotherhood/community facilitator
- Characteristics: Deep identity connection, tribal belonging
- Mode: Rallies, chapters, shared passion

Mayo Clinic:

- Relationship: Trusted expert advisor
- Characteristics: Authoritative, caring, comprehensive
- Mode: Patient-centered, collaborative

Strategic Importance:

Loyalty Driver: Quality of relationship determines customer retention.

Differentiation: Relationship type can differentiate even when products are similar.

Value Perception: Relational value often exceeds functional value.

Word of Mouth: Strong relationships generate advocacy and referrals.

Pricing Power: Relationship-based brands can command premium prices.

Common Mistakes:

- Claiming partnership while acting transactionally
- Relationship type that doesn't match customer needs

- Inconsistent relationship quality across touchpoints
- Over-familiarity or unwanted intimacy
- Failing to evolve relationship as needs change

Best Practices:

- Define ideal relationship type clearly
- Train employees to deliver consistent relationship quality
- Use technology to enhance, not replace, relationship
- Measure relationship health (NPS, satisfaction, engagement)
- Design experiences that reinforce relationship type

4.5 REFLECTION (Externalization - Receiver)

Definition: The stereotypical user that the brand projects in its communications. This is the image of the target customer as portrayed by the brand.

Key Question: When you see this brand's advertising, who do you see using it? What is the idealized user image?

Critical Understanding - "Them" not "Me":

Reflection is **NOT** who actually uses the brand. It's the **aspirational stereotype** the brand projects. It's the "them" - the ideal user the brand wants to be associated with.

What Reflection Includes:

Demographic Stereotype:

- Age range
- Gender
- Social class
- Occupation
- Lifestyle

Psychographic Stereotype:

- Attitudes and values
- Aspirations

- Lifestyle choices
- Social identity

Visual Representation:

- Models in advertising
- Influencer partnerships
- User testimonials
- Imagery in communications

Examples:

Marlboro (Classic Campaign):

- Reflection: Rugged, independent cowboy
- Reality: Many urban smokers, but image was western outdoorsman

Rolex:

- Reflection: Successful achiever, sophisticated professional, explorer
- Visual: Business leaders, athletes, cultural icons in advertising

Apple:

- Reflection: Creative professional, innovative thinker, design-conscious individual
- Visual: Artists, musicians, young professionals in clean, minimalist settings

Patagonia:

- Reflection: Serious outdoor enthusiast, environmental activist
- Visual: Climbers, surfers, conservation-minded adventurers

Chanel:

- Reflection: Elegant, confident, sophisticated woman
- Visual: Timeless beauty, French chic, modern femininity

Red Bull:

- Reflection: Extreme athlete, adventurer, high-energy achiever

- Visual: Base jumpers, Formula 1 drivers, extreme sports participants

Strategic Importance:

Aspiration: Customers are drawn to brands whose reflection represents who they want to be or be associated with.

Social Signaling: Reflection communicates what using the brand says to others.

Target Refinement: Reflection helps clearly define target audience.

Consistency: Reflection should appear consistently across all brand communications.

Common Mistakes:

- Reflection that's too broad (everyone)
- Reflection that doesn't match reality (alienates actual users)
- Reflection that's aspirational but unattainable
- Changing reflection frequently
- Reflection that contradicts self-image facet

Best Practices:

- Define clear reflection stereotype
- Use consistent imagery across communications
- Ensure reflection is aspirational but believable
- Test reflection with target audience
- Allow reflection to evolve with social changes

4.6 SELF-IMAGE (Internalization - Receiver)

Definition: How the customer sees themselves (or wants to see themselves) when they use the brand. This is the internal mirror.

Key Question: When I use this brand, who do I feel I am? What does it say about me to myself?

Critical Understanding - "Me" not "Them":

Self-image is deeply personal and internal. It's not about social signaling to others (that's reflection). It's about **how the customer feels about themselves** when engaging with the brand.

What Self-Image Includes:

Identity Reinforcement:

- Who I am
- Who I'm becoming
- Who I want to be

Self-Perception:

- My values
- My taste
- My judgment
- My status

Emotional Rewards:

- Pride
- Confidence
- Satisfaction
- Validation

Examples:

BMW:

- Self-image: I am successful, performance-oriented, appreciate quality
- Internal feeling: Pride in achievement, confidence in taste

L'Oréal:

- Self-image: "Because I'm worth it"
- Internal feeling: Self-worth, deserving of quality, valuing myself

Whole Foods:

- Self-image: I am health-conscious, environmentally responsible, discerning
- Internal feeling: Virtue, care for self and planet

Harvard University:

- Self-image: I am intellectually elite, capable of highest achievement
- Internal feeling: Validation of intelligence, belonging to excellence

Lululemon:

- Self-image: I am mindful, health-focused, living intentionally
- Internal feeling: Self-improvement, wellness, community

Rolex:

- Self-image: I have made it, I appreciate craftsmanship and heritage
- Internal feeling: Achievement, discernment, timelessness

Strategic Importance:

Deep Loyalty: When a brand reinforces positive self-image, customers form strong emotional bonds.

Premium Pricing: Brands that enhance self-image can command significant premiums.

Advocacy: Customers whose self-image is reinforced become passionate brand advocates.

Resilience: Self-image brands are more resilient to competitive attacks.

Common Mistakes:

- Self-image that's negative or limiting
- Contradiction between self-image and reflection
- Self-image that doesn't match actual brand experience
- Assuming all customers share same self-image
- Ignoring cultural differences in self-concept

Best Practices:

- Research target audience's self-concept and aspirations
- Align self-image with core values and reflection
- Communicate self-image through experiential touchpoints
- Measure how brand affects customer self-perception
- Evolve self-image as cultural values shift

---

5. THE POWER OF COHERENCE

5.1 Why All Six Facets Must Align

Kapferer's critical insight: **Brand identity is only as strong as its weakest, most inconsistent facet.**

The Coherence Principle:

If even one facet contradicts the others, the entire brand identity becomes confused and weakened. Customers sense inauthenticity and dissonance.

Example of Poor Coherence:

Imagine a luxury car brand:

- **Physique:** Ultra-premium materials, elegant design ✓
- **Personality:** Sophisticated, exclusive ✓
- **Culture:** Heritage, craftsmanship ✓
- **Relationship:** White-glove service ✓
- **Reflection:** Wealthy achievers ✓
- **Self-Image:** Successful, discerning ✓

But then:

- **Actual Experience:** Poor customer service, cheap dealership environment ✗

The incoherence destroys the brand identity.

5.2 Testing for Coherence

Questions to Ask:

1. Does the physique visually express the personality?
2. Does the personality reflect the culture?
3. Does the relationship match the self-image customers seek?
4. Does the reflection align with who would embody this culture?
5. Do all sender facets (left) support the receiver facets (right)?

Coherence Audit Process:

1. List all six facets with specific descriptions
2. Check each facet pair for consistency
3. Identify contradictions or gaps
4. Redesign weak facets to align with strong ones
5. Test complete identity with target audience

5.3 Examples of Strong Coherence

Apple:

- **Physique:** Minimalist, premium materials, white/silver
- **Personality:** Innovative, sophisticated, creative
- **Culture:** Think Different, challenge status quo, design excellence
- **Relationship:** Seamless ecosystem, intuitive
- **Reflection:** Creative professionals, innovators
- **Self-Image:** I am creative, design-conscious, ahead of curve

All facets perfectly reinforce "innovative simplicity."

Harley-Davidson:

- **Physique:** Chrome, leather, loud engines, American styling
- **Personality:** Rebellious, independent, masculine
- **Culture:** American freedom, individuality, road culture
- **Relationship:** Brotherhood, community, tribal
- **Reflection:** Independent rebels, free spirits
- **Self-Image:** I am free, authentic, don't conform

All facets perfectly reinforce "rebellious freedom."

---

6. APPLYING KAPFERER'S PRISM

6.1 Brand Identity Development Process

Step 1: Research and Discovery

- Customer insights and needs
- Competitive brand analysis
- Internal capabilities and values
- Market opportunities
- Cultural context

Step 2: Define Each Facet

- Work through all six facets systematically
- Be specific and detailed
- Use examples and descriptions
- Involve cross-functional teams

Step 3: Test for Coherence

- Check all facets against each other
- Identify contradictions
- Ensure sender-receiver alignment
- Verify external-internal consistency

Step 4: Validate with Target Audience

- Test brand concept with customers
- Check if intended facets are perceived correctly
- Refine based on feedback

Step 5: Activate Across Touchpoints

- Translate each facet into tangible expressions
- Create brand guidelines
- Train organization
- Implement consistently

Step 6: Monitor and Evolve

- Track brand perception

- Measure coherence over time
- Adapt facets as needed while maintaining core

6.2 Using the Prism for Brand Audit

Audit Process:

1. **Document Current State:** What is each facet currently?
2. **Identify Gaps:** Where are facets unclear or weak?
3. **Find Incoherencies:** Where do facets contradict?
4. **Compare to Competitors:** How do facets differ from competition?
5. **Assess Distinctiveness:** Are facets unique and ownable?
6. **Check Relevance:** Do facets resonate with target audience?

Common Issues Discovered:

- One or more facets undefined
- Contradiction between facets
- Generic facets that could apply to any brand
- Facets that match competitors
- Disconnect between intended and perceived facets

6.3 Brand Extension Decisions

Using the Prism to Evaluate Extensions:

Before extending brand to new product or market, ask:

1. Can the **physique** transfer to new category?
2. Does extension match brand **personality**?
3. Is extension consistent with brand **culture**?
4. Will **relationship** type work in new context?
5. Does **reflection** fit new category users?
6. Will extension reinforce same **self-image**?

Extension Decision Matrix:

- If all six facets fit naturally: Strong extension potential
- If 4-5 facets fit: Moderate potential, may need adaptation
- If 3 or fewer fit: High risk, likely dilutes brand identity

Example - Virgin Brand Extensions:

Virgin successfully extends across categories because:

- Physique: Red, bold, dynamic (transfers well)
- Personality: Rebellious, fun, challenger (fits many categories)
- Culture: Anti-establishment, customer champion (universal)
- Relationship: Make life more fun and fair (applicable broadly)
- Reflection: Independent-minded, value-seekers (broad appeal)
- Self-Image: I'm savvy, don't accept status quo (universal)

All six facets work across airlines, mobile, fitness, banking, etc.

---

7. KAPFERER'S PRISM VS. OTHER BRAND MODELS

7.1 Kapferer vs. Aaker

Kapferer's Prism:

- Six specific facets, must all be defined
- Emphasizes sender-receiver dimensions
- Focuses on coherence across facets
- Hexagonal structure
- More prescriptive

Aaker's Brand Identity Model:

- Four perspectives (product, organization, person, symbol)
- Core vs. extended identity structure
- Multiple elements within each perspective
- More flexible, less formulaic

- Emphasizes depth and texture

Relationship:

- Both developed in 1996
- Both emphasize multi-dimensional identity
- Can be used complementarily
- Aaker more expansive, Kapferer more structured

7.2 Kapferer vs. Brand Personality Alone

Kapferer's Prism:

- Personality is one of six facets
- Shows personality must align with other dimensions
- Includes customer perspective (reflection, self-image)
- Comprehensive brand identity framework

Brand Personality Models:

- Focus only on human characteristics
- Miss other dimensions of identity
- Don't address coherence systematically

7.3 When to Use Kapferer's Prism

Best Applications:

Brand Creation: Building new brand from scratch - prism ensures nothing is overlooked

Brand Repositioning: Systematic evaluation of all identity dimensions

Brand Audit: Diagnosing identity problems and incoherence

Global Brand Management: Ensuring consistency across markets

Brand Architecture: Evaluating portfolio relationships

Extension Decisions: Testing fit of new products/markets

Less Suitable For:

- Quick tactical decisions

- Very early-stage startups (may be too structured)
- Sub-brands that inherit identity from parent

---

8. CONTEMPORARY APPLICATIONS

8.1 Digital Age Adaptations

While Kapferer's model predates social media, it remains highly relevant:

Physique in Digital:

- Website and app design
- Digital color palettes and typography
- Consistent visual system across platforms
- Motion design and micro-interactions

Personality in Digital:

- Social media tone of voice
- Chatbot and AI assistant personality
- Email marketing style
- User interface copy (microcopy)

Culture in Digital:

- Content themes and values
- Corporate social responsibility communications
- Purpose-driven marketing
- Transparency and authenticity

Relationship in Digital:

- Community management approach
- Customer service interactions
- Personalization and customization
- User-generated content engagement

Reflection in Digital:

- Influencer partnerships
- User testimonials and reviews
- Visual content featuring customers
- Social proof and community showcase

Self-Image in Digital:

- User profiles and badges
- Achievement systems and gamification
- Personalized experiences
- Community belonging signals

8.2 Purpose-Driven Brands

Modern consumers expect brands to stand for something:

Integration with Prism:

Culture Facet: Purpose lives here primarily

- What the brand believes about the world
- Social/environmental commitments
- Vision for positive change

Relationship Facet: Purpose affects relationship

- Partner in making difference
- Shared values basis

Self-Image Facet: Purpose affects self-concept

- I am socially responsible
- I make ethical choices

Examples:

- **Patagonia:** Environmental activism central to all six facets

- **Toms:** One-for-one giving integrated into identity
- **Ben & Jerry's:** Social justice woven through culture

8.3 Experience Economy

Brand identity increasingly manifests through experiences:

Physique: Physical spaces and designed environments **Personality:** How staff interact with customers **Culture:** Values expressed through experiences **Relationship:** Quality of experiential engagement **Reflection:** Who participates in experiences **Self-Image:** How experiences make customers feel

---

9. CASE STUDIES

9.1 Coca-Cola

Physique:

- Iconic red color (Pantone 484C)
- Spencerian script logo
- Contour bottle shape
- Consistent packaging globally

Personality:

- Optimistic, joyful, friendly
- Inclusive, sociable
- Timeless yet contemporary

Culture:

- American heritage and optimism
- Sharing happiness
- Universal moments of joy
- Refreshment and pause

Relationship:

- Companion for shared moments

- Part of celebrations and gatherings
- Accessible, democratic

Reflection:

- People enjoying life together
- Friends, families celebrating
- Universal across demographics

Self-Image:

- I appreciate simple pleasures
- I am part of shared human experience
- I embrace positivity and connection

Coherence: All facets align around "happiness and sharing."

9.2 Patagonia

Physique:

- Functional, durable outdoor gear
- Muted earth tones
- Minimalist mountain logo
- Quality materials emphasizing longevity

Personality:

- Serious, committed, authentic
- Environmental warrior
- Anti-consumerist paradoxically
- Principled, unwavering

Culture:

- Environmental activism
- Quality over quantity

- Business as force for good
- Climbing and outdoor heritage

Relationship:

- Partner in environmental protection
- Provider of tools for outdoor life
- Educator on environmental issues

Reflection:

- Serious outdoor enthusiasts
- Environmental activists
- Quality-conscious consumers
- Anti-fast-fashion advocates

Self-Image:

- I care about the planet
- I value quality and durability
- I make ethical consumption choices
- I am an environmentalist

Coherence: All facets perfectly align around "environmental responsibility through quality."

9.3 Dove

Physique:

- White, soft, gentle visual identity
- Dove bird symbol
- Cream and white product colors
- Soft, approachable design

Personality:

- Caring, supportive, empowering
- Authentic, honest, inclusive

- Maternal, nurturing

Culture:

- Real beauty advocacy
- Self-esteem building
- Challenging unrealistic beauty standards
- Scientific care (Unilever heritage)

Relationship:

- Supportive friend
- Confidence builder
- Partner in self-acceptance

Reflection:

- Real women of all shapes, sizes, ages
- Diverse, authentic representation
- Everyday women, not models

Self-Image:

- I am beautiful as I am
- I reject unrealistic standards
- I am confident in my authentic self
- I care for myself

Coherence: All facets align around "authentic beauty and self-acceptance."

9.4 Tesla

Physique:

- Sleek, minimalist automotive design
- Technology-forward interfaces
- Red Tesla logo
- Premium materials

- Futuristic aesthetics

Personality:

- Innovative, disruptive, bold
- Confident, forward-thinking
- Tech-savvy, intelligent
- Mission-driven

Culture:

- Sustainable energy revolution
- Technology and innovation
- Silicon Valley disruption
- Acceleration of electric vehicle adoption
- Elon Musk's vision

Relationship:

- Partnership in changing the world
- Tech community membership
- Continuous improvement through updates

Reflection:

- Early adopters
- Tech enthusiasts
- Environmental leaders
- Successful innovators

**
